## Experience

- Nov 2022 - Present  
**.NET Software Developer**  
Novacept - London, UK
  - Built and maintained a cutting-edge Property Management Solution (Powered by AI) using Blazor and API technologies during a contract term. The solution offers homeowners and tenants an intuitive online software for managing property services, including tenant information, payment processing, financial reports, and more.
  - Developed an all-inclusive talent life cycle platform for Hire to Retire that manages candidates, partners, clients, hiring managers, account managers, and recruiters. This comprehensive solution enables worldwide sourcing and optimized resource allocation in talent management.
- Feb 2021 - Nov 2022  
**.Net Software Developer**  
Triversa Solutions Limited - Lagos, Nigeria
  - Developed financial and Anti-Money Laundering (AML) reporting enterprise application for government cooperations and banking institutions.
  - Created a regulatory software for regulatory bodies to manage failed banks in Nigeria for NDIC.
  - Designed and developed an ETL application to efficiently handle a large volume of customer data.
  - Managed user acceptance testing and final deployment of applications
- May 2020 - Dec 2020  
**Backend Developer**  
SAED Integrated Services - Lagos, Nigeria
  - Built cross-platform mobile applications with Flutter and implemented top-class design to meet requirements.
  - Developed and maintained APIs with ASP.Net Core
  - Developed scalable web applications in an Agile scrum environment.
